Day 45

❋ UI -

A graphical user interface or GUI presents interactive visual components people can interact with on screen to communicate with technology.

For consistency we refer it as UI.

The information and how it is laid out the icons colors, text, shapes and information that is all the UI.

✳ Xerox PARC was the first PC with a graphical user interface. This UI was refined over the years and Xerox star was launched in 1981 as personal computer.

✳ Figma : A free web based Ux UI design prototyping tool

- It is collaborative and assist designer and developers in building digital product.
- It allows to edit, comment and review design and code together.
- It is web based so it works on all platform like Mac, Pcs running window linux and chromebook
